PROFILE

I have extensive experience developing and maintaining complex web applications. I am proficient in various front-end technologies such as React, Sevelte, and Vue, and have expertise in server-side development with Node.js.

I have a strong understanding of software development principles, including Agile methodologies, version control, and testing.

I am skilled in debugging, profiling, and optimizing code, and am passionate about building high-quality web applications that meet the needs of users and businesses alike. Overall, I am a highly skilled and motivated developer with excellent communication and collaboration skills.

EDUCATION

Bachelor of Physics, Jagannath University, Dhaka
January 2020

★ PROJECTS

JoShare | File sharing web app

Technologies: TypeScript • Next.js • Socket.IO • Express (express.js) • Docker

Live

I have used trpc api for the backend to ensure end-to-end type-safety. I have deployed the file and socket servers on a private server using docker and nginx. Frontend is deployed on vercel.

Mess Pro

Web app built with Bun, Elysia and React

Live

modal-rt

Technologies: TypeScript • React • npm

Live

This is a simple and lightweight react modal library written in Typescript.

Link Shortner

Technologies: TypeScript • Next.js

Live

It's a basic yet customizable link shortener app where you can shorten your links, customize your short links, and create personalized links.

1337x-torrent-serach-api

Technologies: JavaScript • Express (express.js) • API

Live

1337x Torrent searching API.

Personal Portfolio

Technologies: Next.js • React
